Good morning all, please review the request from Camilo with the Dept. of Agriculture below. My understanding is that he will not be crawling around underneath the home, but does need to get pictures of where the material was place. I am wondering if anyone might have pictures of those locations that they might be able to share with Camilo. If so, please contact him to discuss. If not, the. add. Milton will need to consideration this request. Personally, I am good with this request. Thanks

Shaun

Subject: Amarillo Aluminum Phosphide Incident

Good afternoon,

I would like to formally request access to incident site in Amarillo (b) (6) (b) (6) Amarillo, TX 79107) pertaining to TDA Report - Aluminum Phosphide incident.

The reason for this request is to take few photos of space under the trailer/house property in relation to location of pesticide piles (within a safe distance and in less than 10 minutes tops).

I would like to do this task according to your protocol any day of the week.

Thanks

Camilo A Garzon
TDA Inspector
